Committee Report (Substituted)

### **DIGEST AND PURPOSE**

Texas is one of the fastest growing states in the nation. It had a population of nearly 21 million in 2000 and its rate of growth has exceeded that for the nation as a whole since the first census in 1850. Texas is also a diverse state geographically, economically, and in terms of the racial/ethnic characteristics of its people. Determining the size and distribution, the characteristics, and the implications of Texas population change for private and public-sector service demand and for the socioeconomic characteristics of Texas is of clear importance for Texas government as it plans for the state's future. C.S.S.B. 656 creates the Office of the Texas State Demographer and the position of state demographer in order to ensure the continuation of effective demographic and related socioeconomic analyses for the State of Texas.

### **RULEMAKING AUTHORITY**

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.
