Committee Report (Substituted)

AUTHOR'S/SPONSOR'S STATEMENT OF INTENT

Many of today's youth suffer from obesity, which has reached epidemic proportions. There is a much higher percentage of children who are overweight, and many children have increasingly sedentary lifestyles. Moreover, the number one risk factor for adult obesity is obesity in adolescence. Poor diet and physical inactivity account for an estimated 300,000 deaths each year; only tobacco use causes more preventable deaths. That reality not only threatens quality of life but indicates looming health care costs for the state in the future. Studies show that comprehensive prevention programs have reduced obesity and prevented the onset of diabetes and that children who are physically fit perform better academically.

C.S.S.B. 426 would better use schools to address the issue of obesity and to improve the health and productivity of school-age children. C.S.S.B. 426 requires TEA to collect best practices and develop incentives to provide access to school campuses after regular school hours and allows comp-ed funding to be used for transportation. It also creates a Texas Fruit and Vegetable Pilot Project to provide free snacks for students throughout the school day in Tarrant County and another district to be determined in the lower Rio Grande Valley.
