### **AUTHOR'S / SPONSOR'S STATEMENT OF INTENT**

Current law does not regulate the operation of group homes for residents who are not related to the provider and that are provided by individuals or business concerns for adult persons who are disabled by reason of mental health or mental retardation or are elderly and who are in need of quality, safe, supervised housing. At present, state statutes only require the licensing, inspection, and regulation of such facilities where there is clear evidence of providing varying degrees of medical services, prescription administration, treatment, or therapeutic services. There are no restrictions or regulation on the size, management, or overall operation of these facilities which are typically funded from the personal assignment of the affected resident's disability stipend--usually Social Security--to the facility provider.

Under current law, local governments are singularly the only source of very limited regulation. That regulation is restricted to residential zoning rules, health and safety codes, and other civic policy ordinances under the Local Government Code. With the exception of a limited pilot program established by S.B. 6, 79th Legislature, Regular Session, 2005, (Article 2, Section 2.20) there is no regulatory requirements or state agency authority to effectively monitor and enforce adequate safeguards for the estimated 4,000 residential operations throughout the state serving a conservative estimate of 65,000 affected citizens. With the exception of individually reported and investigated cases of abuse through the Department of Aging and Disability Services (DADS), state agencies currently do not have the authority to require registration, inspection, and oversight or enforcement of such facilities and lack even general investigative authority to ensure the safety and well-being of the residents.

H.B. 1168 expands and makes permanent, statewide, the pilot program, previously established, for registration, licensing, and oversight of this category of residential homes. The bill requires procedures that would allow other state agencies and appropriate local authorities to participate in the process as well as information sharing for the purpose of protecting citizens who are tenants of these homes. Additionally, this bill would utilize the fees and any penalties assessed and collected to be used to offset administrative costs and to use the remainder to continue to expand services to elderly or disabled citizens. This bill requires a bi-annual report to the legislature detailing the program status that may be included as part of the other DADS operational summaries but should be clearly specified as to purpose and scope.

### **RULEMAKING AUTHORITY**

Rulemaking authority is expressly granted to the executive commissioner of the Health and Human Services Commission in SECTION 2 (Sections 247.033, Health and Safety Code) and SECTION 3 (Sections 254.003, 254.033, 254.034, 254.037, 254.038, 254.039, 254.061, and 254.065, Health and Safety Code) of this bill.
