S.B. 1110

AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

Currently, cities, counties, school districts, and other agencies have several alternatives to traditional low-bid delivery of certain construction projects. These alternatives include construction manager-agent, competitive sealed proposals for construction services, construction manager-at-risk, design-build, and job order contracting. All of these methods are listed in different statutes for different governmental entities.

As proposed, S.B. 1110 consolidates alternate project delivery process for most governmental entities into a single chapter of the Government Code; expands the types of entities that are authorized to use these procedures to include hospital districts, junior colleges, and others; allows construction manager-at-risk and competitive sealed proposals for construction services to be used for all types of projects (horizontal and vertical) including water, wastewater, transportation, utilities and other improvements to real property; prohibits reverse auctions for certain contracts where bonds are required; authorizes job order contracting to be used for the maintenance, repair, alteration, renovation, or minor construction of an existing facility; limits the use of interlocal agreements for design and construction services, which are site-specific by nature; and makes other cleanup and conforming changes.

RULEMAKING AUTHORITY

Rulemaking authority previously granted to Texas Facilities Commission is rescinded in SECTION 2.08 (Section 2166.2525, Government Code) of this bill.

Rulemaking authority is expressly granted to a governmental entity in SECTION 2.09 (Section 2267.051, Government Code) of this bill.
