Committee Report (Substituted)

AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

Pre-kindergarten and appropriate child care has been documented and reported to increase the educational and social success of children. Many parents enroll their children in a variety of child care facilities that are regulated by the Department of Family and Protective Services (DFPS). The certification and training for child care workers and operators is regulated by DFPS as well.

In recent years, there has been an increase in incidents occurring at child care facilities and by child care workers that have resulted in harm to or even death of a child. Many in the industry, as well as parents and other interested parties, believe that increased training would decrease these incidents. It is also the belief that increased training would provide the workers and directors with more knowledge on child care operations and services for children.

C.S.S.B. 1730 amends current law relating to minimum training standards for employees of certain child-care facilities.
