### **AUTHOR'S / SPONSOR'S STATEMENT OF INTENT**

Under current law, Water Control and Improvement Districts and other similar districts are required to have all fiscal accounts and records audited by a certified public accountant annually. However, smaller districts that have no outstanding bonds or other long-term liabilities, gross receipts less than \$100,000, and cash and temporary investments less than \$100,000 are exempt from the audit requirements.

Smaller districts typically have low overhead and reserve funds in a low interest savings account for future capital repairs of water systems. Those funds gain a small amount of interest and since the district is not engaged in long-term projects, the earned interest is used to pay for the required audits. In the case of these small districts, the audits can consume up to one-half of the interest earned, which is the only new revenue coming into the district.

S.B. 1361 increases the exemption cap in Section 49.198 (Audit Report Exemption), Water Code, from \$100,000 to \$250,000. Raising the cap would allow additional districts to be able to qualify for this exemption, thereby reducing their costs associated with an annual audit. Districts would still be required to file an annual financial report with the executive director in lieu of complying with the annual audit.

As proposed, S.B. 1361 amends current law relating to the audit report exemption for districts created pursuant to the Water Code.
