AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

Historically, the Texas Constitution and the legislature have not provided counties with the necessary authority to regulate land development or to adopt/enforce meaningful building codes for unincorporated areas. This lack of authority led to unregulated construction and development of substandard housing/dwellings (colonias) along the border beginning in the 1950s.

County officials have argued over the years that the lack of ordinance-making authority places the safety and quality of life of residents at risk. Additionally, the inability of counties to have limited ordinance-making authority threatens neighborhoods and the dreams of families for a better life, and it can impede growth of cities, as well as the expansion of local economies.

S.B. 1363 would provides certain counties with the necessary permissive limited authority to regulate and plan development to help stop the proliferation of substandard residential development. As a local control initiative, it provides counties the tools to regulate development and adopt meaningful building codes for unincorporated areas in an effort to provide safe and healthy living conditions. S.B. 1363 would enable counties to pass rules that affect: the size of the lots; the percentage of a lot that may be occupied; and the location of buildings or other structures on a lot. Additionally, it allows counties to adopt regulations relating to the preparation of a plan for utility development, environmental effect and adaptation, utility extension, and capacity planning and providing financial analysis of said plan.

As proposed, S.B. 1363 amends current law relating to authorizing certain counties and municipalities to regulate land development and provides a penalty.

RULEMAKING AUTHORITY

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.
