### **AUTHOR'S / SPONSOR'S STATEMENT OF INTENT**

The Gulf Coast Waste Disposal Authority (GCWDA) was created in 1969 to originally serve Chambers, Galveston, and Harris counties for the purpose of providing waste disposal systems and regulation of disposal of waste to enhance and protect the waters in Galveston Bay. GCWDA also provides waste water services for the City of Odessa and the local industries in that community under the provisions of the Regional Waste Disposal Act (Chapter 30, Vernon's Texas Water Code), as was authorized by a 1995 amendment to GCWDA's enabling legislation.

In recent years, as a result of the prolonged drought, several requests have been made to GCWDA to lend its expertise to providing treatment of other waters—e.g., brackish, reuse, non-potable surface, saline—which fall outside of “waste water treatment” industrial settings in order to meet the needs of its commercial and industrial customers.

HB 3871 seeks to correct the inability to respond to these requests. H.B. 3871 expands the “purpose” clause of the GCWDA enabling legislation to include “water systems.”

H.B. 3871 amends current law relating to the powers and duties of the Gulf Coast Waste Disposal Authority.

### **RULEMAKING AUTHORITY**

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.
