AUTHOR'S / SPONSOR'S STATEMENT OF INTENT

Articulation agreements, partnerships between institutions of higher education to transfer and accept specific course credits from one another, are prevalent throughout Texas' institutions and are an integral part of the transfer system. The number and scope of agreements vary from institution to institution and can be difficult for transfer students to navigate.

S.B. 802 requires the Texas Higher Education Coordinating Board (THECB) to collect data and report to the legislature on best practices between these higher education institutional partnerships. Currently, little data is collected on which institutions have articulation agreements with one another and which majors those agreements are centered around. This bill allows the legislature to gain a better understanding of the types of articulation agreements that exist and learn best practices that could be duplicated.

S.B. 802 amends current law relating to a study and report regarding best practices in the transfer of course credit between public institutions of higher education.

RULEMAKING AUTHORITY

This bill does not expressly grant any additional rulemaking authority to a state officer, institution, or agency.
