To arrange check out and delivery of any of these items, you can submit an online request through the **New & Noteworthy** page on our website, contact the library at 512-463-1252, or use our **PDF request form**.

1. Elderhood: Redefining Aging, Transforming Medicine, Reimagining Life

By Louise Aronson

Examines aging with the goal of changing perceptions and practices in the medical field and giving society a new appreciation for growing old. Draws from anecdotes from the author's personal life and work as a geriatrician, as well as history, science, literature, and popular culture, to provide the perspective that elderhood is simply another unique stage of life with positive and negative facets.

2. The Essential J. Frank Dobie

By Steven L. Davis, editor

Gathers in one volume the "most vital" writings of J. Frank Dobie, an environmentalist, civil rights advocate, folklorist, and writer who has been called the father of Texas literature. Includes pieces that inspired readers to action ranging from establishing what would become Big Bend National Park to saving the Texas Longhorn breed of cattle from extinction. Explores his sometimes controversial opinions on serious political topics, as well as more lighthearted matters like cedar fever.

3. In Pain: A Bioethicist's Personal Struggle with Opioids

By Travis N. Rieder

Recounts the author's devastating experience with opioid dependence and withdrawal that began with a motorcycle accident, followed by multiple surgeries and poor pain management. Examines the inadequacy of the American healthcare system when it comes to managing pain with opioid therapy. Discusses the history of opioids since their invention in the 1800s, the changing attitudes about pain management, and how to improve the treatment of chronic pain in a manner that helps patients but avoids opioid dependence.

4. Modernizing the Electric Grid: State Role and Policy Options

By Glen Andersen, Megan Cleveland, and Daniel Shea

Analyzes the current U.S. system of electricity generation, transmission, and distribution, the components of the modern electric grid, and the recent explosion of new technologies, from electric vehicles to energy storage. Recommends policy and regulatory approaches to update the electric grid for a modern energy system. Continues the discussion in an accompanying podcast, **Power Play: States Address U.S. Electric Grid**. National Conference of State Legislatures, 2019, 51 pages

5. Redistricting Law 2020

By Mchelle Davis, et al.

Explains fundamentals of current redistricting law to assist legislators and their staff with the upcoming redrawing of electoral districts. Addresses ten major legal topics that are applicable to redistricting. Highlights new developments in redistricting law relating to the *Voting Rights Act*, partisanship, legislative privilege, and population. Includes summaries of each legal topic by chapter, relevant case law from this decade, and historic Supreme Court cases.

6. Regional Differences in the Drugs Most Frequently Involved in Drug Overdose Deaths: United States, 2017

By Holly Hedegaard, et al.

Studies data from the 2017 National Vital Statistics System-Mortality files to compare drugs most frequently involved in drug overdose deaths, grouped by U. S. Department of Health and Human Services regions. Argues that understanding regional differences of drugs used in overdose deaths could assist prevention and policy efforts.
